Election/Restrictions

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- I. Claims 12-16, drawn to a continuous process for producing a polyarylene sulfide, classified in class 528 subclass 480.
- II. Claims 17, drawn to an apparatus, classified in class 435 subclass 6.
- III. Claims 18-19, drawn to a method for detecting a liquid level, classified in class 73, subclass 299.

The inventions are distinct, each from the other because:

The apparatus may be used to produce other moieties etc. other than the recited polyarylene sulfide.

Further, the method for detecting a liquid level may be used to detect other liquids other than polyarylene sulfide.

Conversely, polyarylene sulfides may be made from other process treatments and vessels.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.
